

 TURVANASTA

Quality and Environmental policy 2023

Quality and Environmental Policy 2023

A stable and caring family business

The history of Turvanasta dates back to the 1960s. Even back then, our aim was to design studs that could withstand extremely demanding driving conditions and wear less on the road surface than their predecessors. Our values are: 1) Professional pride, 2) Being solution-oriented and 3) Working together. We also manage quality and safety based on these values.

Our quality and environmental policy supports our company strategy. Our people commit to customer, environmental and quality requirements as well as to occupational safety requirements during their initial training.

Precise processes ensure quality monitoring

We have established clear processes for quality control to ensure high quality of work and products as well as the safety and protection of our staff and the environment. We aim to prevent any deviations and to identify possible defects as early as possible.

Sustainability is a natural part of our DNA

The lifespan of our products, the manufacturing methods and the raw materials we select, support the sustainable development goals (SDGs). The life cycle of our products also takes into account the recycling of end products.

As a company, we are committed to continuous improvement of all operations. We are part of the UN Global Compact.

In the order-to-delivery process, we comply with the regulations and the legislation governing our activities. Our business aims to ensure customer satisfaction, financial profitability, job stability and the well-being of our employees and workplaces.

Accredited test laboratory supports our work

In the Accredited Test Laboratory testing and measurement activities are carried out in accordance with laws, regulations and standards so that our operations meet our customers' and other stakeholders' requirements.

The Accredited Test Laboratory works on the basis of delivering to our customers the measurements that define product development and sustainability work that is conducted within a pre-agreed timeframe, that has been carefully executed and accurately documented with absolute confidentiality.

In addition to the ISO 9001 and ISO 14001 standards, Turvanasta's Accredited Test Laboratory follows the principles and requirements of the ISO/IEC 17025 standard.

The Accredited Test Laboratory is a separate organisation and its independence and impartiality are guaranteed. In all its activities, the laboratory is committed to maintaining the confidentiality of all information obtained or generated during the testing and measurement activities.

A management system to support continuous development

Turvanasta's management is committed to developing and maintaining a corporate governance system to ensure consistency and transparency – and to improve all operations.

Problem Solving Attitude

We greet challenges with curiosity,
ambition and courage.

Joint Effort

We help each other and we generate
success as one team.

Professional Pride

We strive for excellence
in everything we do.
